DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Van Ornum (US 4,539,344) and further in view of either one of Sandstrom (US 4,502,520), Beers (JP 7-266454), or Shimada (JP 9-309974). As best depicted in Figure 2, Van Ornum teaches a sealant-containing tire construction comprising a sealant chamber 24 and an air chamber or tire cavity, wherein said chambers are separated by an innerliner or partition 18. In describing the innerliner, Van Ornum suggests the use of a material having air impermeability as is extremely well known in the tire industry. While the reference fails to expressly describe the 300% modulus of the innerliner, the claimed modulus of less than 60 kgf/cm² represents a broad and conventional range that would have been obvious to one of ordinary skill in the art at the time of the invention. For example, Sandstrom (Table 2), Beers (Tables 1 and 2), and Shimada (Table 1) describe a plurality of embodiments in which an air impermeable, innerliner composition has a 300% modulus below 60 kgf/cm² (same as 5.9 MPa). Thus, one of ordinary skill in the art at the time of the invention would have found it obvious to form the innerliner of Van Ornum from a material having a 300% modulus below 60 kgf/cm² since such materials

represent those commonly used for air impermeable, innerliner tire components in view of the prior art references noted above.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Justin R Fischer** whose telephone number is **(703) 605-4397** (if after December 18, 2003, (571) 272-1215). The examiner can normally be reached on M-F (7:30-4:00).

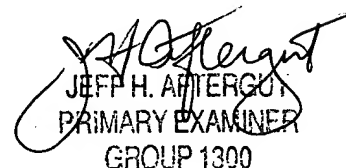

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Crispino can be reached on (703) 308-3853. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9310.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
